## 50-54/144-148 MHz 6 meter/2 meter

Performance: This antenna provides unity gain on 6 and 2 meters with a power handling capacity of 200 watts.
Stylish and Durable: These antennas are manufactured using the finest corrosion resistant materials and finishes available. The base is triple plated chrome brass with a large insert molded low loss coil form and a spring loaded, gold plated contact.
Broadband: The large diameter coil form used in the construction of the loading coil allows for a wider operational bandwidth and better matching characteristics than competitive models.
Weatherproof: O ring seals and overlap construction keep moisture out of the antenna.
Economical: These base loaded antennas feature a great price to performance ratio.

Standard Mounting: All Comtelco base loaded antennas mate with the standard TAD/NMO type mount.
