

Performance: These antennas provide 5dB gain in a flexible whip design for standard duty service. They have a power handling capacity of 200 watts.

Stylish and Durable: They are manufactured using the finest corrosion resistant materials and finishes available. They are available in brite and black finishes.

Economical: These antennas provide an outstanding price to performance ratio.

Versatile: These antennas are shipped needing no cutting for maximum performance across the 2.4-2.5 GHz band.

Standard Mounting: This series of antennas mate with the standard TAD/NMO type mount, providing an excellent moisture seal even when the antenna is removed.

SPECIFICATIONS:

FREQUENCY RANGE:	2400-2500MHz
GAIN:	5 dB
IMPEDANCE:	50 ohms
POWER RATING:	200 watts
VSWR:	<2.0:1
RADIATOR:	Stainless steel, .062 diameter
BASE:	Brass, triple plated chrome nut
LENGTH:	10" (25.4cm)
MOUNTING:	Standard TAD/NMO type

Vertical Pattern
