

MOVING WIRELESS FORWARD®

New Products, Tradeshow, RedCap, and Much More!

Mobile Mark Adds A Six Pack!

Our last newsletter focused on Mobile Mark's many new activities, products, and excitement. In quarter one, the excitement continued, adding six new products to the Mobile Mark brand. The first of new products, the "six-pack" is our much-anticipated LTX1700 series. This new product family begins by adding an impressive assortment of nine products to the Mobile Mark brand. The 17-cable LTXG1788 antenna includes eight Global 5G Sub-6 LTE antennas, eight WiFi 6E/7 antennas, and one GNSS antenna that operates on GPS, Galileo, Glonass, QZSS or Beidou. So much more to learn, so visit our website at www.mobilemark.com or use this link: [The New LTX 1700 Series](#). Second, is the Active RX Antenna, covering 50-1000MHz.

The Active RX is rugged enough for the military, has a compact form factor, and is multifunctional. Active RX applications include Land Mobile Radio (LMR) for efficient troubleshooting and optimization. Its versatility is key in scanning, security, drone detection, situational awareness, and threat detection applications. The SM Series antenna is our third product; with enhanced sensitivity and accuracy, it is perfect for remote sensor and monitoring needs. This antenna is compact, easy to install, and low-profile. Learn more, Link: [SM Series](#). Its small size makes it ideal for many WiFi and 5G IoT applications that require multiple wireless connections in a tiny footprint, such as Kiosks, roadside cabinets, utility enclosures, automotive, and more. Fourth, is the ECO-600/7200 is a wideband 5G/LTE antenna with omnidirectional radiation operating in the frequency range of 617-960 MHz, with a peak of 2 dBi, and 1710-7200 MHz, with a peak of 7 dBi. It is much shorter, lighter, and less susceptible to wind resistance than others on the market and is enclosed within an all-fiberglass housing for ruggedness and longevity. Typical applications are cellular, IoT, CBRS, and FirstNet Public Safety. Learn more at: [ECO-600/7200](#). Fifth is the DOD3-600/7200, a MIMO 2-element version of the DOD series. It is a heavy-duty omni-directional cellular antenna that covers 5G and is backward compatible. Its rugged design and technical capabilities make this antenna ideal for MIMO Mobile/Fixed Private 5G/LTE Wireless Network Systems. Find out more: [DOD3-600/7200](#).

From Across the Pond – Our European Office

Linda Clark, Managing Director of Mobile Mark Europe, recently celebrated her 35th anniversary of service with Mobile Mark. Over the decades, Linda has grown personally alongside the industry, making close business partnerships and friendships. Her leadership, knowledge, and passion are evident in everything she does, and Mobile Mark is thankful to have her on the leadership team. This year, her dedication and passion was rewarded. Linda was awarded a special "Coronation medal" in gratitude for her dedication and involvement in the Coronation of King Charles III on May 6, 2023, and. Learn more about Linda, "[The Great People of Mobile Mark](#)".

Last but not least is the new versatile mounting bracket for our covert CVW series, CVW-UMK. The bracket comes complete with all the hardware, allowing for four mounting positions: desk, window, wall, or DIN-Rail. This high-performing antenna has more applications due to the multiple ways it can be deployed. Learn more at: [CVW-UMK](#). Of course, all our products are versatile, customizable, and have lead times of three weeks or less, all the standards you've come to expect from Mobile Mark.

RedCap – We've Got You Covered

While it has been around for a while, many are unfamiliar with the term "RedCap" and looking for products supporting it. Known by several names; RedCap, eRedCap, or NR-Light are mainly used for low data rate devices, where the speed of traditional 5G is not required. Among the advantages are low prices for data and lower power requirements, which are perfect for sensors and control systems. The system uses 1 channel communications on most devices, but there are options for 1x transmission and 2x receiving systems. Traditional 1x 5G antennas will be the main requirement, but more advanced applications will use 2x2 MIMO antennas. Look no further; Mobile Mark has many product families that support RedCap. See for yourself: [RedCap](#). Or to learn more, we invite you to discuss with [Jerry Posluszny, Vice President of Engineering](#). Mobile Mark, "Moving Wireless Forward®".

Comtelco Video – Trusted By Those YOU Trust

Get reacquainted with a staple in the Land Mobile Radio (LMR) industry with our new video. Since 1982, Comtelco has been respected by those in the Land Mobile Radio (LMR), specifically by the men and women in the public safety and law enforcement community. It's been synonymous with quality, reliability, high performance, and longevity for nearly forty years. Since 2017, Comtelco has proudly been a Family Brand of Mobile Mark, Inc. Remember, when it's all on the line, Comtelco by Mobile Mark. Watch; [Comtelco A Family Brand of Mobile Mark, Inc.](#) Also follow us on LinkedIn, Twitter, Facebook, and YouTube.

Mobile Mark Most Wanted – See Our Latest MUGS

At Mobile Mark, we've simplified the tedious task of matching your Routers, Gateways, Modems, and Devices from leading brands to our premier antennas. It's no wonder our customers ask for them by name. With eight recent additions, these Match-Up Guide Sheets (MUGS) align the number of connections on each router with the corresponding antennas. Also, consider the frequency bands, the number and types of ports, types of connectors and cables, and mag mount versions of our Antennas. See all of our MUGS at; [MUGS](#).

Tradeshows, Tradeshows, Oh My!

In March, we participated in three tradeshows over two weeks, a complex and expensive task, to be sure. Exhibiting at IWCE and Channel Partners in Las Vegas and Dtech in Dallas, Texas, gives evidence to Mobile Mark's commitment and dedication to its customers, partners, and the many industries it serves. Exhibiting allowed us to meet current customers and colleagues, introduce our six new products and forge new relationships and partnerships. We listen to your needs. Be assured we're working on them. If you missed us at these shows, watch out for our upcoming shows via social media and direct email invitations.
