## COMPACT COVERT 5G/LTE ANTENNA

### PRODUCT OVERVIEW

The CVWG-WB2 Series is a 2-cable Covert and Compact Antenna covering 5G/LTE from 617 - 960 MHz & 1700 - 7200 MHz and GNSS. The 5G ready antenna solutions make it possible to connect to any of the current or planned cellular frequency bands that reside within that range. Although this antenna was designed for Cellular, it could also be used for WiFi 6e covering the 2.4, 5 and 6 GHz band. The GNSS element operates on GPS, Galileo, Glonass, QZSS or Beidou.

It is an excellent choice for 5G ready mobile hotspots or Industrial IoT networks requiring a discreet, low profile antenna solution. This antenna can be used indoors or outdoors and can be mounted with double sided tape.

This 5G ready solution can be used in many environments including vehicles, NEMA boxes, and outside sensing location.

This covert antenna can be mounted to the outside of a metallic container. It can also be mounted to either the inside or the outside of a non-metallic container such as a plastic or fiberglass NEMA box.
