

Performance: 3.5dBd / 5.5dBi gain is achieved from 760-870MHz in this high performance, wide band antenna. This antenna requires no tuning.

Stylish and Durable: These antennas are manufactured using the finest corrosion resistant materials and finishes available. They come with a large powder coated brass adaptor, which provides the extended band coverage.

Reliable: The ABS base has an ultrasonically welded brass insert and a gold plated spring-loaded contact for long-term reliability.

Standard Mounting: These antennas mate with a standard TAD/NMO type mount, providing an excellent moisture seal even when the antenna is removed.
