

Technical Specification
MINI MAGNET MOUNT

MMG SERIES MOUNTS
INSTALLATION KITS

The “**MMG**” series mounts are mini type magnet mounts 2 ¾” in diameter. They have a high pull strength magnet with an ABS cover and mylar pad to prevent surface scratches. The connectors on the top of the mount are all standard female type. The mounts are supplied with 12’ RG58A/U coax and choice of connectors on the end of the cable. Cable options such as Microloss 900 low loss cable are available.

The “**MMGBNC**” mount is designed to accept a standard “BNC” type “Rubber Duck” flexible antenna.

The “**MMGTNC**” mount is designed to accept a standard “TNC” type “Rubber Duck” flexible antenna.

The “**MMGSMA**” mount accepts an SMA mount “Rubber Duck” flexible antenna

The “**MMGN**” mount is designed to mate with the BNM series Comtelco antennas as well as most male “N” type flexible type antennas.

Choose connector by adding suffix below

- 01 TNC
- 02 BNC
- 04 MINI-UHF
- 06 PL259 (Crimp)
- 07 TYPE “N”
- 10 SMA
